EDUCATION

Sri Eshwar College of Engineering	B.E(CCE)	CGPA : 8	2021-2025
Mani Higher Secondary School	HSC	86.5%	2019-2021
Mani Higher Secondary School	SSLC	79%	2018-2019

EXPERIENCE

RUMANGO SOFTWARE AND CONSULTING SERVICES Mar 2025 (PRESENT)

- Engineered backend services for **Internet Banking, Loan Services, Account, and Maintenance** modules using **Java 8+ and Spring Boot**, supporting secure, high-availability banking operations.
- Built and optimized **RESTful APIs** for account details, transactions, and customer data handling to enable seamless integration across core banking systems.
- Designed and executed complex **SQL operations (CRUD, Joins)** to ensure accurate data flow and fast response times across modules.
- Implemented clean, standards-driven code aligned with enterprise banking requirements, ensuring maintainability and audit ready compliance.
- Managed version control with **Git**, actively participating in peer code reviews to improve code quality and delivery stability.
- Developed and deployed **Machine Learning-powered APIs** for **Face Recognition** and **Iris Recognition systems**, integration biometric authentication into secure application workflows.

PROJECT

Diamond Trust Bank:

Worked on a core banking system covering **Account, Maintenance, Loan, Queues, Card, and Cheque modules** using Java and Spring Boot. Built REST APIs and database operations to support banking workflows and integrated **OCR-based ML models** to auto-extract customer data from documents, reducing manual entry. **Tech Stack: Spring Boot, Oracle SQL, Machine Learning.**

ABC Bank – Loan & Queue Management System:

Developed the **Loan and Queue modules** with backend services, APIs, and database integration. Implemented **OCR - powered ML models** to read customer documents and auto-fill personal details, improving onboarding speed and data accuracy.

Tech Stack: Spring Boot, Oracle SQL, Machine Learning, Deep Learning.

Face Recognition System:

Built a face recognition system using machine learning, with user data stored in a **SQL** database. Implement **REST APIs** using flask and deployed the solution in docker for real-time access. **Tech Stack: ML Algorithms, Flask, SQL**

Iris Recognition System:

Developed an iris recognition system leveraging **ML models** and **SQL** database integration. Created **REST APIs** with Flask and deploying the application using docker for efficient and scalable use. **Tech Stack: Deep Learning Algorithms, Flask, SQL**

TECHNICAL SKILLS

Languages: Java | Python

Web development: HTML | CSS | Spring Boot

Professional Skills: Data Analytics | Statistics | Machine Learning | Data Visualization | Python libraries

Database: SQL

Core Concepts: DSA | OOPS | DBMS

Tools: VS Code | Microsoft Power BI | Jupyter Notebook | Sublime | Spring Tool Suite | Microsoft Excel | Github | Postman API

ACHIEVEMENTS

Leetcode: Max Rating :1420 | solved 100+ Problems

Codechef: Max Rating :1206 | Solved Problems in Contest

Skillrack: Solved 1000+ Problems

GeeksforGeeks: Solved 100+ Problems

Authored a research paper presented at an IEEE Conference on a [VisionPark – Next gen computer vision for efficient parking space monitoring](#)

CERTIFICATIONS

Certified in Supervised Machine Learning: Regression and Classification, **Coursera** 2024

Certified in Excel for Data Analysis (IBM), **Coursera** 2024

Certified in Java, **Udemy** 2024

Certified in Data Structures & Algorithms using C and C++, **Udemy** 2023

Certified in Introduction to Artificial Intelligence, **Great Learning** 2023

Certified in Introduction to SQL, **Great Learning** 2022
